Web Multimodal Presentation Format (WebMPF)

Specification 1.0

10/26 2026

David Li dave@deckbird.ai

WebMPF, a.k.a. smart video, aims to design a simple video format that renders faster, consumes less tokens, and full customizable than the popular MP4.

System Components

A WebMPF smart video consist of one or more Key Frames. Each Key Frame can be updated independently.

Key Frame

Each Key Frame has the following components:

- Title
- Image
- Animation Effect
- Narration
- Duration
- Video

Title

Text, describe the title of this key frame.

Title is an optional component.

Image

Supports JPEG, PNG, or other image formats. It can also be a hyperlink to a image source online.

Image is a optional component.

Animation

Describe how the Image should be displayed. The options are: None, Move In, Slide Up, Fade In.
Animation is a mandatory component. The default value is None.

Narration

Narration text.

Narration is an optional component.

Duration

The duration of the narration text, in seconds. It also indicates how long the image should be displayed.

Duration is an mandatory component. The default value is 3.

Video

Supports encoded MP4, MOV or other image format. It can also be a hyperlink to a video source online.

Video is an optional component.

JSON Syntax

When creating or rendering a WebMPF smart video, the JSON syntax is:

```
{
    "WebMPF": {
        "title": "example video”,
       "author": “sample author”,
       "duration": “60s”,
       "creation-date": “10/20 2026”,
       "update-date": “11/20 2026”,
         "key frame": {
```

```
            "title": “the first frame",
            "image": {
                "file": “sample_image.png”
                "source": “https://website.com/si.png”
                “Content”:"encoded image file"
             }
            ”animation": {
                "effect": “[none,move in,slide up, fade
                           in]”
             }
             "narration": {
                "text": “sample narration text”
             }
              “duration": “30s”
             "video": {
                "file": “sample_video.mp4”
                "source": “https://website.com/sv.mp4”
                “Content”:"encoded video file”
               }
            }
        }
}
```
